Commissioner and Inspector of works
(bouwkundig toezichthouder / directievoerder / projectmanager)
2000 – 2001
Geotechnics, labour law/collective agreement, reading and interpretation of designs, organizational
behaviour, law of contracts, road paving, general knowledge of gas, measurements and budgets,
Safety / hygiene and health at work, manufacture and testing of concrete, Reinforced Concrete and
Pre-stressed, Information Technologies and Communication.

I am an Architect currently living in Amsterdam since 2010.

My professional career began as a project manager in building construction, interior design, interior architecture, retail and hospitality.

All these concepts, materials and colour selection showed me a very detailed attention to architecture, a subject that has fascinated me since childhood.
I went to the Faculty of Architecture and Arts of the University Lusiada of Porto to study Architecture and Arts.

Since my graduation in 2009, I’ve collaborated with several architecture studios, real estate developers and contractors.

I am interested in design as a creative discipline that interacts dynamically with other technical specialties and integrates social, economical and environmental inputs in order to conceive and deliver the best optimized solution to any specific need.

I have a great passion for what I do and I like to design with a wink and a smile, good sense, experience, knowledge and skills.

I’ve always been meticulous and concerned with the details and that’s reflected in my work, always with the intention to allow the qualitative and quantitative growth for those involved in the project, responsible in the exercise of functions as well as hard work and good relationships in general.

This is a labour of love and I am truly proud of being a team player.
